

JARDINIÈRES

We recommend that you use a metal tape measure for the most accurate measurements.

Net curtains are supplied with cut edges; we recommend that you sew the sides of the curtains so they do not fray. This service costs £5.00 per curtain.

How to measure for Jardinières

You need to measure the Width (A) and the Drop (B) by following the instructions below:

Curtains

A - The width

Jardinières come in three widths. Please use the chart for optimum fullness.

Size	To fit window
254cm (100")	Up to 150cm (5ft)
381cm (150")	Between 150cm (5ft) and 210cm (7ft)
508cm (200")	Between 210cm (7ft) and 300cm (10ft)

B - The drop/length

Measure from the top of your wire or rod to the bottom of your window frame. They come in standard drop sizes so you need to order to the nearest size.
