

WINDOW SETS

We recommend that you use a metal tape measure for the most accurate measurements.

Window sets can be hung using a rod or wire.

Each pack contains 2 curtains with an attached valance and a pair of matching tie backs.

The width

- 250cm-280cm (98-110in) wide sets will fit windows 90cm- 180cm (36in - 72in) wide
- 400cm (157in) wide sets will fit windows 150cm - 240cm (60in - 96in) wide

The drop/length

Measure from the top of your wire or rod to the bottom of your window frame. The window sets come in a few standard drop sizes so you must order to the nearest size.
